Dear Sir/Madam,

It is my pleasure to recommend Mr. Alex Soman to your institution. I first met Alex in my AP Physics 1 class last year and now have the privilege of teaching him again in AP Physics 2. During this time, Alex has distinguished himself through his intellectual curiosity, ambition, determination, and collaborative spirit.

Alex embodies the strengths of a discoverer, consistently seeking knowledge, exploring ideas, and asking insightful questions to deepen his understanding of complex subjects. His achieving spirit drives his energy and passion for reaching ambitious goals, and his competitive nature further fuels his pursuit of excellence. He not only strives to succeed individually but also inspires and motivates his peers, often taking on leadership roles in group settings.

During lab work and activities, Alex consistently takes initiative, coordinating tasks and ensuring his team meets its goals efficiently. A shining example of his strengths emerged during a week-long research project in my AP Physics 1 class, in which his group investigated the physics of a "Hanging Sign" outside the Physics classroom. Alex guided his peers, organized their work, and applied innovative problem solving techniques. When challenges arose, he proposed creative solutions that led his team to success while demonstrating perseverance and adaptability.

Alex's positivity and resilience are equally remarkable. Even under pressure, he maintains a calm and focused presence that promotes a productive and supportive environment, enabling both himself and those around him to excel.

In summary, Alex is an exceptional student whose combination of curiosity, ambition, competitiveness, leadership, and resilience makes him an asset to any academic community. I am confident he will make meaningful contributions to your institution while continuing to challenge himself at a high level. Please feel free to contact me for further information or with any questions regarding Alex's qualifications.

Sincerely,

Jovanna Theodosopoulou

AP Physics Teacher
